

Quadrate Announces Updates to ERP²[®], a Data Upload Product for SAP[®]

New Version Enables Users to Upload Digital Files without Altering Format

South Harwich, Mass., November 9, 2011 – [Quadrate](#), a leading software company specializing in data loading, data extraction and reporting for [SAP](#)[®] solutions, today introduced the latest release of [ERP²](#)[®], a program used to upload Excel and Access files into SAP, enabling end users and IT staff to work with SAP systems more efficiently.

ERP² now allows users to upload more than 999 line items in financial transactions. The newest release also improves long text support by allowing users to make changes to long text fields in SAP. Additionally, ERP² contains a new data simulation feature letting users simulate uploads, and also enables users to import multiple files simultaneously.

ERP² lets users upload digital files into SAP without manual data entry or [Advanced Business Application Programming \(ABAP\)](#). Moving data out of spreadsheets and databases into SAP systems can be time consuming and expensive. ERP² provides users a cost-effective solution that is installed directly onto the workstation without changes or installations to existing SAP systems.

“The latest release of ERP² makes template creation even easier for our users and eliminates some of the workarounds needed previously to record long text fields,” said Charles Evans, Project Manager, BackOffice Associates[®]. “Our customers are going to find our new simulation feature as a great way to measure the quality of their input data without needing to update anything in SAP.”

ERP² can be used for various applications within different SAP modules, including mass uploads and maintenance of SAP data, SAP data migration and the automation of SAP data entry.
